Education

Chulalongkorn University | Bangkok *Graduation expected in May 2027*
Bachelor of Engineering in Chemical Engineering (GPAX 3.78/4.00)
Coursework: Kinetics & Reactor Design, Fluid Mechanics, Heat & Mass Transfer, Instruments & Electrical Systems, Safety in Chemical Processes, Separation Processes, Process Dynamics & Control, Process Design

Skills & Technical Tools

Programs: Python, MATLAB, Aspen HYSYS, Fusion 360, AutoCAD, Microsoft Office
Technologies: NumPy, PyTorch, Matplotlib, Scipy, Jupyter, Simulink

Projects

Argon Molecular Kinetics Simulation | *Python, NumPy, Matplotlib, PyTorch* *Apr – Sep, 2026*
- Validated the ideal gas model by calculating the Boltzmann constant within 2.17e-4 % relative error
- Implemented Lennard-Jones interactions, statistical mechanics, and Verlet integration in Python from scratch

McCabe-Thiele Absorber Calculation Python Package | *Python, NumPy, Matplotlib* *Apr - Jun, 2026*
- Launched open-source Python package for absorber which precise to the machine epsilon within 0.2 ms.
- Developed rating problem solver algorithm for constant partition coefficient using Newton's method

Data-Driven System Identification in Chemical Process | *Python, NumPy, Matplotlib, Jupyter* *Feb, 2026*
- Developed data-driven model for non-linear reactor dynamics, <1.2% RMSE across 960 snapshots within 20 ms
- Identified key limitations of Koopman operator model as error accumulation on discrete structure

Activities & Extracurriculars

Intania Open House 2026, Booth staff | Faculty of Engineering, Chulalongkorn University *Mar, 2026*
- Presented chemical engineering undergraduate programs, research examples, career paths, admission and life on campus to around 300 people of high school students and their parents

CU Integration Bee 2024, Participant | Hall of Intania, Chulalongkorn University *Feb, 2024*
- Competed with others in solving challenging integration problems, qualifying to the final round with 3-person team of engineering students and won the competition

Experience

Production Engineer Intern | Siam PVS Chemicals Co. Ltd. *Bang Pu, Samutprakarn | May – Jul, 2026*
- Conducted field survey and drafted P&ID update in chlorine bottling plant, identifying discrepancies in piping layouts, instrument relocations for more than 10 points to be fixed
- Trained Process Safety Management, Why-Why analysis, and working in confined space
- Compiled laws, standards, accident case studies, and best practices for chlorine handling training
